

This text is two inches

[IT IS 12 POINT FONT][which is 12char per inch]

---size of text and points within the graph is in mm, .pt is a var in ggplot

---where the mm are font size / .pt, so for font size 12, mm are 4.21751764217518 mm.

---the boxes are two inches, which is 2 times 12 /.pt, 4.21751764217518 mm.

[This PLOT SIZE IS probably 7.3 WIDTH, 4.5 HEIGHT:

----- 7 by 5 same as 7 5

[device size pixels rstudio, and for rendered: 1344 by 960 1344 960

[furthermore if you set the break at 48 columns']][then this is 4in and, total is 8 inches across

---Pix per inch: 192 or 192 . range: 0 1 ---Pct devoted to plot: 0.82285712967687 0.73
